

Example of Testing & Commissioning Job Description

Powered by www.VelvetJobs.com

Our growing company is hiring for a testing & commissioning. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for testing & commissioning

- Ensure that installations are fully functional to contractual specifications
- Have strong documented background in mechanical engineering
- Be a member of a professional body
- Have evidence of recent successful and relevant experience, management and leadership
- In addition to leading significant projects, overseeing the full project portfolio to share interdependencies and recommending trade-offs and phasing to manage competing resourcing and budget demands
- Leading and monitoring projects to ensure delivery on time, on budget and to required quality levels
- Implementing and managing project gate reviews with the CIO to ensure each project has a robust business case, controls and delivery plan
- Defining and maintaining standards for successful execution including documentation and metrics related to portfolio, programme, and project management
- Managing contracts and schedules
- Managing project performance via operational KPIs, monthly reviews and other metrics

Qualifications for testing & commissioning

- Electrical Engineering degree level qualifications & experience

- 5 years of S&C testing and commissioning experience
- 5 years in a test lead role
- Proven ability to build strong relationships with other stakeholders and other coworkers
- Deep professional know-how and experience in Engineering/Site Engineering
