Our growing company is hiring for an user experience intern. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for user experience intern

- Creating flow diagrams, wireframes, interactive prototypes, and UI specifications that adhere to accessibility and mobile-ready guidelines and maintain design consistency and coherence across product
- Conduct use studies working directly with end users in our experience lab to better understand the pain points around traditional IT and how disruptive it is to their productivity
- This internship will provide an opportunity to have exposure to the creation and delivery of enterprise presentations, blogs, posters and video
- Learn about measuring the efficacy of enterprise user change management
- Conduct a competitive and market assessment of the Market Intelligence platform
- Supporting UX research and testing on all formal, online and in-store user tests and interviews
- Aid in the creation of research and testing scripts
- Support the creation of research and testing analysis and reports
- Assist with recruiting and qualifying participants for future studies
- Partner with members of the UX team and other stakeholders to develop executive-level presentation materials that highlight the intersection between Information Security and User Experience

Qualifications for user experience intern

- Experience with data analysis and modeling
- Experience with AI, machine learning or text analytics a plus
- Take on a user experience (UX) project that will improve an aspect of our game development tools
- Collaborate - Work closely with a team of tools engineers, quality assurance, artists, and designers on Overwatch
- Deliver - Drive and support your ideas all the way through the successful launch of your project
