

Example of User Interface Developer Job Description

Powered by www.VelvetJobs.com

Our company is looking for an user interface developer. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for user interface developer

- You consult with the Product organization of Fiori Launchpad when it comes to decisions in your area of expertise
- You are helping to shape the quality focus of the team
- IOS app development for a 3D building visualization and indoor localization system
- IOS app user interface design and implementation
- Integration of existing Smart Campus software infrastructure into mobile app interface
- Complete all tasks related to technical analysis, design, development and unit testing, quality assurance, system test and implementation of ReactJS web application in accordance with the IT development life cycle
- Work closely with product owners, SMEs, content writers, SEO/SEM strategists, data analytics and IT development teams to understand what is possible and what will have the biggest impact on improving the user experience across the digital properties and services you will be designing
- Ensure all deliverables conform to company's Digital Experience Standards
- Translate requirements and insights into user journeys, screen flows, wireframes, and high fidelity prototypes
- Work closely with the research team that will test and validate designs iteratively throughout the design process

Qualifications for user interface developer

- Between 3-to-6 years of agency or in-house experience
- Hold a four-year college degree in design, computer science or related field
- Expert knowledge of Javascript/JQuery
- Working knowledge of photoshop (Sketch a plus)
- Experience designing for common/multiple platforms (iOS, Android)
