Our growing company is hiring for a vp-data. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for vp-data

- Create a robust documentation suite to clearly articulate data definitions while highlighting data quality gaps for inclusion in Technology and Process Improvement roadmaps
- Partner with data engineering and strategy/planning teams to correctly interpret, understand and use available data
- Develop tracking and data collection strategy to support business objectives
- Create regular reports through reporting software to manage detailed dashboards and metrics
- Develop and continuously improve measurement approaches, processes, tools and techniques
- Design creative and aesthetically sound visualizations and literature to communicate analysis results, data characteristics, messages and themes, ideas, processes, and methodologies in both textual and graphic mediums
- Translation of design wireframes to product customisations that will interact with back-end APIs to produce visual elements of the systems
- Engage with the LOB Control Teams and CIB Central Support Program teams to identify Risk and Control reporting needs
- Analyze and normalize data from various sources to design and create analytics to support the detection of risks and control uplifts
- Joint architect of strategic measurement, risk thematic analytics and reporting, leveraging BI and dashboard tools to support the needs of the CIB LOB Risk & Control, Program and Senior Management Teams

- An expert with at least one of key reporting/visualization tools such as Tableau or QlikView / QlikSense
- Hands on experiences with a database and/or transformation tools
- Financial Services background or experience in Investment Banking or Asset Management is a plus
- Experience in IT delivery and architecture including experience as a Data Modeler and/or DBA, application design and programming
- Ability to balance business demands and IT fulfillment in terms of standardization, reducing risk and increasing IT flexibility
- Hands on experience with third party tracking and reporting tools such as DoubleClick (DART), Omniture and/or Webtrends including a strong knowledge of Advanced Reports such as reach vs
