

Our company is growing rapidly and is looking for a vp-senior analyst. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

Responsibilities for vp-senior analyst

- Lead in mapping data requirements using third party data and in developing data capture, validation and recordkeeping systems
- Lead in conducting research and writing both in-depth topical research and issuer-focused research reports on carbon transition risk and integrating relevant language into credit opinions
- Represent the company in external outreach explaining our views on the carbon transition risk and the analytical approach taken to assess its implications
- Coordinate with other internal teams including CFG and PIF ratings team members, CSS, project management and Information Technology team members as needed
- Lead in drafting periodic update presentations to senior management on progress in developing the CTR tool
- Attend internal discussions, including ESG regional working group meetings, to further the development of MIS's ESG capabilities
- Build and maintain effective working relationships with rating groups
- Lead projects to improve the quality of credit analysis and rating methodologies
- Provide guidance to rating teams to ensure consistency with methodologies and challenge analytical thinking with a different perspective when appropriate
- Write in-depth, high quality, insightful research on broad credit topics

- VP level, 7 - 10 years financial services experience with a minimum of 5 years experience in performance measurement preferred
- At least seven years of relevant experience in Operations, covering of investment reporting, tax reporting and financial reporting
- Strong knowledge of market instruments
- A good understanding of the custody business, especially funds administration including processes and workflows
- Complete sophisticated financial modeling for a number of different business scenarios, supporting clients by analyzing relevant data, identifying and addressing clients' needs and building and reviewing quantitative models
- Provide advice to senior managers with regards to the market value of M&A Investments
